

Mad River Watch Site Profile

RIVERSIDE PARK

Site Coordinates: 44.135210, -7284467

Site Location Description:

Warren’s Riverside Park Conservation Area, Route 100 just south of Sugarbush Access Road. Above Clay Brook confluence.

Parking and Access: Park in the Riverside Park parking lot. Follow the dirt trail directly in front of the parking lot (east) to the river.

Sampling Location: At the river, turn right and walk a few feet up the shoreline to move away from the main swimming area.

Ease of Access: Very easy access. Open with a trail and small step down to the edge of the river.

Analytes: Temperature, conductivity, pH

Riparian Buffer Description: Open, grassy area near swimming hole. Japanese knotweed on banks on either side of the river. Opposite bank is mostly forested. Disturbed site with high use.

Naturalist Notes (Ecology, History, Wildlife, Plant Species, etc.): Japanese knotweed is pervasive here.
