

**Mad River Watch Site Profile**

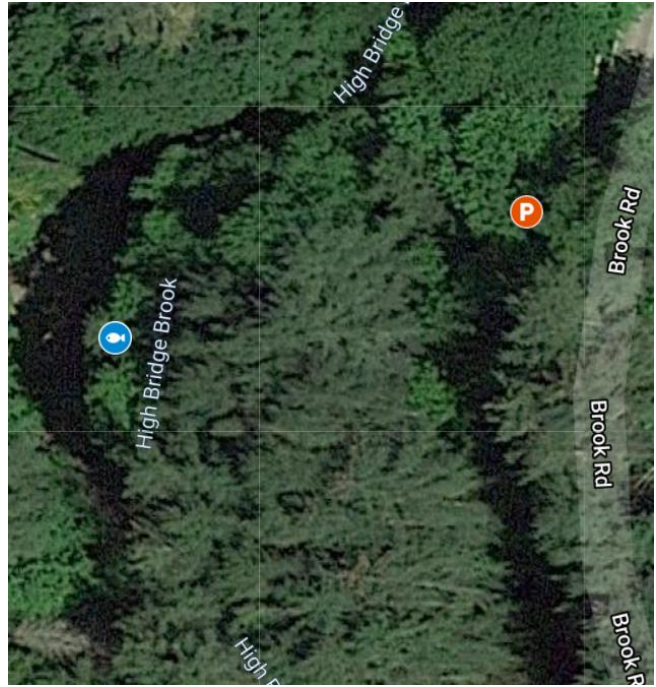

**HIGH BRIDGE BROOK**

**Site Coordinates:** 44.185250, -72.815806

**Site Location Description:** Brook Road, Waitsfield, just off Joslin Hill Road.

**Parking and Access:** Turn onto Brook Rd from Joslin Hill and park in the pullout on the west side of the road. This is a forested area. Follow the edge of the embankment down to the stream, where the vegetation is more sparse.

**Sampling Location:** Sample directly above the "S" curve in the stream, above the culvert. There will be a house on the far bank to your right, and another on the far bank directly in front of you.

**Ease of Access:** No trail and slightly steep walk through forest but overall, only moderately difficult.

**Analytes:** Temperature, Conductivity, P, N

**Riparian Buffer Description:** Forest on both sides of the bank, N. Hemlock stand. Access to the brook from two houses on the opposite bank. Large opening in trees upstream of sampling location on opposite bank.

**Naturalist Notes (Ecology, History, Wildlife, Plant Species, etc.):** N. Hemlock trees (great wintering deer habitat), aster spp. growing along banks in open areas.

**Other Comments:**
