

HEALTHY LAND. CLEAN WATER. VIBRANT COMMUNITY.

Mad River Watch Site
Profile
USGS GAGE

Site Coordinates: 44.27707, -72.74252

Site Location Description: USGS gage station on Spillway Road in Moretown, off Route 100B.

Parking and Access: Park on the edge of Spillway Road above the USGS weir across the river. Walk down a small trail through vegetation to the weir.

Sampling Location: Stand on a flat rock next to the weir to collect samples.

Ease of Access: Relatively easy walk down to the river.

Analytes: Temperature, Conductivity, P, N

Riparian Buffer Description: Few trees on the bank, but mostly open on either side. Japanese knotweed along the edge near the site. Across the river, private property with large, open fields.

Naturalist Notes (Ecology, History, Wildlife, Plant Species, etc.): Japanese knotweed, Common mergansers.

Other Comments: Site of U.S. Geological Survey gaging station.
